Subject: Laboratory Operations on Evacuation Day (St. Patrick's Day) Holiday

Importance: High

March 17 is a Suffolk County only holiday, although all state employees regardless of where they work receive this day as a paid holiday. Because most of the private and public sectors throughout the state, as well as our major clients such as hospitals, are operating as usual, all of our laboratory service functions must be operational for routine business as well as prepared to respond to extraordinary events. (This is the same policy we have followed for this holiday for at least the past 18 years.) All laboratories must be staffed and capable of receiving samples, performing tests and responding to telephone calls especially regarding test result reports. All laboratories must have supervisory staff on site as well as an appropriate number of personnel to provide routine services.

Please send Kristen Pribeck by the end of today a list of personnel who will be working on March 17. If you have any questions regarding coverage, please call me today. Thank you.

Ralph Timperi, MPH
